PROFILE

A seasoned System Engineer with over 20 years of experience in creating stable and secure IT environments. Skilled in tackling complex challenges and fostering team spirit. Previously volunteered with the “LizaAlert” SAR team, demonstrating a commitment to community service.

KEY SKILLS

- **System Administration:** Advanced Linux, network configuration, and system optimization.
- **Infrastructure as Code (IaC):** Proficient in Terraform, Ansible, and SaltStack.
- **Containerization and Orchestration:** K8s, OpenShift, Docker.
- **Virtualization and Cloud Services:** VMWare vSphere, AWS, Cloudflare.
- **CI/CD Tools:** Experience with GitLab CI, Jenkins, and Drone CI.
- **Monitoring Tools:** Configured and maintained Prometheus, VictoriaMetrics, Grafana, Zabbix, ELK stack, Datadog, and Splunk.
- **Scripting:** Skilled in Bash and Python scripting for automation and tool development.
- **Database Management:** Dealt with PostgreSQL, MySQL, Clickhouse, and MongoDB.
- **Soft Skills:** Effective communication, problem-solving, teamwork, mentoring, and technical recruiting.

LANGUAGES

- **Russian:** Native
- **English:** Professional Proficiency

EXPERIENCE

System Engineer, SOFTSWISS; Tbilisi, Georgia — Mar 2022 – Dec 2023

- An integral part of the Infrastructure Operations team for an iGaming platform service;
- Facilitated team growth by participating in technical interviews and mentoring.
- Managed on-call duties, resolving critical production issues and conducting thorough RCAs.

- Enhanced infrastructure through IaC practices, documentation, and monitoring system development.

DevOps Engineer, Vsemayki.RU; Novosibirsk, Russia — Nov 2020 – Dec 2022

- Core IT team member for a leading online custom merchandise shop.
- Supported infrastructure, software development workflows, and IaC, ensuring product and system availability.

DevOps Engineer, Supl.biz; Tomsk, Russia — Nov 2019 – Aug 2020

- Supported the transition to a microservices architecture, optimizing performance and scalability for a B2B marketplace.

DevOps Engineer, Bank of Russia; Tomsk, Russia — Dec 2018 – Nov 2019

- Focused on CI/CD pipeline development, IaC, and monitoring across staging and production environments.

System Engineer, Tomsk State University; Tomsk, Russia — Nov 2011 – Dec 2018

- Rebuilt and modernized the faculty network infrastructure, incorporating advanced networking, security, and virtualization technologies.

EDUCATION

Tomsk Polytechnic University

OBJECTIVES

That's a part of my ambitions: to go further with my career in DevOps/SRE, with active involvement in building reliable and innovative IT infrastructures. I am ready to become part of the projects whose main goal is the improvement of current production processes utilizing new technologies and the building of efficient and scalable systems. I am ready to come and make a difference within a dedicated team, to deliver top-notch technical and business results.
